

## X-DELTA ORBIT S

OUR MOST UNIVERSAL CAPABLE HYDRAULIC MULCHER YET!

Introducing the X-Delta Orbit S Mulcher—built for both forestry and grassland. With durable Orbit hammer rotor technology and dual cutting hammers, it offers efficient forward and reverse mulching, reducing cutting time and boosting overall productivity. A high-performance hydraulic motor with advanced valve control ensures smooth operation and longevity, even in harsh conditions. Ideal for semi-forestry and grass clearing, the X-Delta is a versatile, high-efficiency mulcher designed to last.

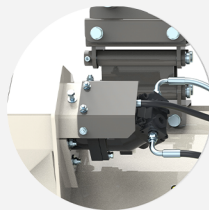

### 1. Forestry

The durable Orbit hammer rotor technology makes forestry jobs possible

### 2. Dual direction

Due to the dual cutting hammer technology the mulcher can be used forwards and backwards. Which helps to reduce the cutting time and improves efficiency!

### 3. Hydraulic power

The hydraulic motor with the valve technology for pressure and flow control with freewheel on the rotor makes the whole hydraulic system stand apart from other similar machinery.

### 4. Heavy built

With a completely new design, the X-Delta Orbit S mulcher is set to use in harsh conditions with long lasting life time.

### 5. Universal use

The dual cutting hammer technology and the overall design makes it possible to use the mulcher for semi forestry and grassland clearing as well.

## Specifications

Models	Weight kg	Working width mm	Drive system	Tool pieces	Width mm	Length mm	Height mm	Oil pressure MPA	Hydraulics L/min
S 1000	380	1000	3 V-belt	16	1180	860	640	200	70-100
S 1200	414	1200	3 V-belt	20	1380	860	640	200	70-100
S 1400	448	1400	3 V-belt	24	1580	860	640	200	70-100
