

DELTA XL GRIZZLY

SOIL-DEEP REMOVAL OF OVERGROWTH AND TREE TRUNKS IN FOREST PLOTS

Powerful and productive. For professionals who want to thoroughly cultivate forest plots. Heavy solid WIDIA-hammers remove overgrowth and tree stumps up to 70 mm below the surface. The hydraulic tilting frame supports the feeding of large shrubs and small trees and increases productivity. Ideally suited for owners and those working in uncultivated woodland and heavily overgrown areas.

1. Limiter on Rotor, Built for heavy jobs

Designed to handle demanding tasks. The integrated rotor limiter prevents overload, allowing continuous and reliable operation even under tough conditions.

2. Teeth that don't bark

Redesigned, extra-reinforced opening rear door, equipped with counter-blades and heavy raking teeth

3. Better visibility

The newly designed push frame is stronger and simpler, while providing improved visibility of the working area.

4. Wider than ever

The intake has been widened and optimized with a larger upper hydraulic push bar and improved feed in design at the rotor, allowing more efficient processing of bulky vegetation and increased output.

5. Easy maintenance

Quick-release inspection and maintenance doors on side and front. Ensuring fast access for routine servicing.
